How often can I utilize the services at ChillRx?

For best results pair services & utilize multiple services during your visit

Cryotherapy

Safe to do daily. The more often you come, the better your results will be. If you are trying to treat a condition such as pain & inflammation, then we recommend that you come 3-5 times per week at minimum.

Infrared Sauna & Slim Pod

Safe to do daily. If you are trying to lose weight or treat a condition such as pain & inflammation, then we recommend that you come 3-5 times per week. We recommend pairing this service with cryotherapy which is commonly known as "Fire & Ice". By pairing this with cryotherapy, you can burn between 800-1000 calories and achieve relief from aches, pains, and chronic conditions faster.

Compression Therapy

Safe to do daily. If you are trying to treat lower body pain or circulation issues, 3-5 times per week is ideal. Can also be used as needed for recovery after intense exercise or long-distance events. Using compression after ChillSculpt helps drain the fat that you lost during the service faster.

Light Therapy

Safe to do daily. For anti-aging or treating acne, 2-4 times per week is recommended. For conditions such as Alopecia, you may need to come 3-5 times per week to see results. You can use light therapy while using the Slim Pod or Compression boots to maximize your time while at ChillRx.

ChillSkin

Hand applied treatment. Safe to do every 2-3 days. For best results, we recommend 1 treatment every 2 days for 2-3 consecutive weeks. A total of 3-5 treatments on average are needed to see results. No downtime is needed except to avoid sun exposure for at least 24 hours after treatment.

StarSculpt

Static treatment. Safe to do every 10 days. For best results, we recommend 1 treatment every 10-14 days. A total of 5-10 treatments on average are needed to see results. Results can be permanent if paired with a healthy lifestyle. No downtime is needed except to avoid rigorous exercise for 24 hours after treatment.

ChillSculpt

Hand applied treatment. Safe to do every 10 days. For best results, we recommend 1 treatment every 10-14 days. A total of 5-10 treatments on average are needed to see results. Results can be permanent if paired with a healthy lifestyle. No downtime is needed except to avoid rigorous exercise for 24 hours after treatment.
