## How often can I utilize the services at Chill?

For best results pair services & utilize multiple services during your visit

- Cryotherapy** Safe to do daily. The more often you come, the better your results will be. If you are trying to treat a condition such as pain & inflammation, then we recommend that you come 3-5 times per week at minimum.
- Infrared Sauna & Slim Pod** Safe to do daily. If you are trying to lose weight or treat a condition such as pain & inflammation, then we recommend that you come 3-5 times per week. We recommend pairing this service with cryotherapy which is commonly known as "Fire & Ice". By pairing this with cryotherapy, you can burn between 800-1000 calories and achieve relief from aches, pains, and chronic conditions faster.
- Compression Therapy** Safe to do daily. If you are trying to treat lower body pain or circulation issues, 3-5 times per week is ideal. Can also be used as needed for recovery after intense exercise or long-distance events. Using compression after ChillSculpt helps drain the fat that you lost during the service faster.
- Light Therapy** Safe to do daily. For anti-aging or treating acne, 2-4 times per week is recommended. For conditions such as Alopecia, you may need to come 3-5 times per week to see results. You can use light therapy while using the Slim Pod or Compression boots to maximize your time while at Chill.
- ChillSkin** Hand applied treatment. Safe to do every 2-3 days. For best results, we recommend 1 treatment every 2 days for 2-3 consecutive weeks. A total of 3-5 treatments on average are needed to see results. No downtime is needed except to avoid sun exposure for at least 24 hours after treatment.
- StarSculpt** Static treatment. Safe to do every 10 days. For best results, we recommend 1 treatment every 10-14 days. A total of 5-10 treatments on average are needed to see results. Results can be permanent if paired with a healthy lifestyle. No downtime is needed except to avoid rigorous exercise for 24 hours after treatment.
- ChillSculpt** Hand applied treatment. Safe to do every 10 days. For best results, we recommend 1 treatment every 10-14 days. A total of 5-10 treatments on average are needed to see results. Results can be permanent if paired with a healthy lifestyle. No downtime is needed except to avoid rigorous exercise for 24 hours after treatment.
